

BLACK BIN IT

- ✓ Nappies (securely wrapped in bags)
- ✓ Contaminated Plastics
- ✓ Contaminated Food Wrappings
- ✓ Vacuum Cleaner Contents
- ✓ Bagged Ash
- ✓ Broken Delph
- ✓ Broken Glass

IMPORTANT:

Material in your Black Bin must be kept dry to enable us to capture as much recyclable material as possible.

WHAT HAPPENS TO MY BLACK BIN MATERIAL?

All dry recyclable material is captured from the black bin such as Metals, Aluminium and PVC.

Oxygen separate and bale the recyclables which are then shipped on for the next stage in the recycling process.

This greatly reduces landfill emissions of methane and dramatically reduces the need for landfill space.
